

Decorative Options

Colors and Finishes

TruFit Windows are available in white or beige interior colors. For the appealing look of natural wood, choose optional light oak, dark oak, foxwood or cherry woodgrain finishes. A white woodgrain interior is also offered with a beige exterior only. Standard exterior colors are white and beige. An optional American Brown exterior is available with a white or beige interior finish.

Interior Grids

Classic grids are available in complementary white or beige, with Colonial, Diamond, Prairie and Double Prairie patterns. Contoured Colonial grids feature a modeled "cut wood" look and are available in complementary colors and in matching woodgrains. We also offer narrow Colonial grids with a bright-brass finish. All grids are enclosed within the insulated glass unit for easy cleaning.

V-Grooved Cut Glass

TruFit Windows are also available in a variety of cut and polished V-grooved glass patterns.

Authentic Beveled-Leaded Glass

All leaded glass is hand-crafted using hand-cut glass, crystal bevel clusters, and hand-soldered camings. Available in four attractive glass styles to suit your architectural décor. Select a coming metal to match your taste – brass, pewter or lead.

Using advanced design and superior materials, TruFit Windows produce outstanding energy savings and trouble-free operation.

1. Vinyl frames and sashes will never chip, peel, crack or warp. Made with premium raw materials, the vinyl color is formulated throughout so the beautiful luster lasts.
2. Multi-chambered sash and mainframe create insulating air spaces for thermal efficiency.
3. Quad 4 weatherstripping at the header adds greater protection from the elements.
4. Insulated glass unit featuring triple-paned glass with optimal air space improves year-round performance.
5. PPG Intercept® Warm-Edge Spacer System maximizes thermal efficiency and the life of the insulated glass unit.
6. Interlock at sash meeting rail creates a super-tight seal against air infiltration, providing security, comfort and well-being.
7. Steel reinforcement adds strength at the meeting rail.
8. Drop-in glazing provides energy efficiency as well as interior aesthetic appeal.
9. Compression bulb seal at the sill creates an all-season weather barrier sealing tightly against dust, dirt and air infiltration.
10. Sloped sill forces water to drain to the exterior of the window.
11. Hidden screen track for clean lines and added beauty.
12. Foam-filled sash and mainframe for optimal insulation efficiency.

Welcome

Windows should be your way to view the outside world in complete comfort no matter what the conditions are outside. Windows should let light shine in your home without fading and damaging your valuable fabrics and furniture. If you find yourself closing your drapes and blinds on a beautiful sunny day only because your air conditioner can't keep up, Call Us Now. If you avoid sitting in your favorite chair on a snowy day because it's too close to that drafty picture window, Call Us Now.

If you are one of the millions of people who are concerned about our environment and the rising cost of energy, replacing your old windows with TruFit Windows will give you a great feeling knowing you are Saving Money and Helping the Environment. You can be sure you've made a smart purchase when you see the superior quality of your window including a Lifetime Limited Transferable Warranty.

I had been checking around for some much needed replacement windows when I saw your ad for \$188.00 windows installed with Low-E and argon gas included! I thought there had to be a catch to it. Needless to say I had 13 installed AND WE LOVE THEM! So "GO GREEN" with TruFit, and save a lot of GREEN for your family.
 — David LaFollette

A Green Choice for the Environment!

It is no secret that the energy crisis in America has affected all. With energy costs hitting record highs across the nation, a "Green Movement" is at the forefront of our daily headlines. Green cars, energy-efficient appliances, electric cars and wind powered plants are just a few of the new technologies at the receiving end of billions of dollars of research and development. Although the outcome, timeline and availability of these new earth-friendly advancements are not predictable, we do have things we can do today. The TruFit Window Collection provides you with a total solution to your every day energy needs. From monthly heating and cooling expenses to labor intensive maintenance, TruFit Windows is your total energy solution provider.

Good looking windows that improved the appearance of our house. Workmen were prompt, professional, punctual and finished the job at the price quoted that was hundreds of dollars less than all the other estimates we received.

– John and Ann Blevins

Windows are still high on a number of homeowners' must-do/ must-have lists. Not surprisingly, window replacement continues to rank high in the Cost vs. Value survey, both in terms of value at sale and cost recovered. According to the Efficient Windows Collaborative, the heating bill for a 2,000 square-foot home with high-performance, energy-efficient windows is 39% lower than a comparable home with single-pane, aluminum windows.†

Enjoy Greater Comfort, Lower Energy Bills.

No matter where you live, it costs money to stay comfortable. In the summer, you pay to keep heat out of your home; in the winter, you pay to keep it in. That's when ordinary windows become a costly problem. They do little to stop the gain – or loss – of heat. That's why Tru Fit Windows are such a great investment. They incorporate more than a dozen advanced design features that effectively block the flow of heat, saving you money and keeping you comfortable, season after season.

Did You Know?

Tru Fit Vinyl Window and Patio Doors...

- Are so durable that the vast majority of vinyl windows installed over the past 25 years are still in use. At the end of their long, useful life – like all vinyl – they can be recycled.*
- Reduce electricity usage. A study conducted by Franklin Associates found that using vinyl over alternative framing options saves the U.S. nearly two trillion BTUs of energy per year – enough to meet the yearly electrical needs of 20,000 single-family homes.
- Vinyl can be reprocessed and recycled repeatedly. Scrap is routinely recycled into other vinyl products. In fact, 99% of the vinyl used by processors goes into a finished product.*
- More than eight million pounds of window profile waste is diverted from landfills annually thanks to successful buy-back programs initiated by window manufacturers.*

TruFit Window Collection

Open your home to the beauty of Wider Perspectives.

Choose from the clean lines offered by a Casement or Awning window. Dramatically change the environment of an entire room with the addition of a Bay, Bow or Garden window. If ease of operation and cleaning are a must, the Swing & Clean sliding window may be for you. Or, literally open up your home to the great outdoors by choosing a Sliding Patio Door. In considering your own personal taste, we've got you covered whether it's window style, or decorative enhancement.

Double-Hung Windows are the perfect windows for traditional beauty and exceptional performance. The tilt-for-cleaning benefit makes them a favorite among homeowners.

- Exceptional strength and rigidity are created with state-of-the-art fusion-welded sash and mainframe.
- Incredible welding strength is obtained from our multi-wall extrusions.
- Increased insulation, comfort and security are added benefits of the interlock at the sash meeting rail.
- Sloped sill for timeless beauty and prevention of water accumulation.
- Energy efficiency as well as interior aesthetic appeal is achieved with streamlined drop-in glazing.
- Stainless steel constant force balance system for smooth and effortless operation of sashes.
- Contemporary design of the window includes a hidden screen track for clean lines and added beauty.

Designed with smooth sitelines and ease of operation, Sliding Windows offer a functional style without sacrificing the aesthetic appeal.

- Exceptional strength and rigidity are created with state-of-the-art fusion-welded sash and mainframe.
- Multi-wall extrusions provide incredible welding strength.
- Contemporary design of the window includes a hidden screen track for clean lines and added beauty.
- Infiltration of outside elements is blocked by multi-layered weatherstripping.
- Nylon-encased dual brass roller system for easy, dependable operation.
- Theft deterrent locks for added sense of security.
